

### **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application.

#### **Listing of Claims:**

1. (Currently amended) A system comprising:
  - a personal digital assistant (PDA) comprising a rechargeable battery; and
  - a cellular phone comprising a rechargeable battery adapted to be coupled to the PDA so that upon coupling the cellular phone to the PDA the combined cellular phone and PDA forms a single body[.];
  - wherein when the PDA and the cell phone are coupled, either the cell phone rechargeable battery or the PDA rechargeable battery can power the combined cellular phone and PDA.
2. (Original) The system of claim 1, wherein the size of the single body is substantially the same as the size of the PDA.
3. (Original) The system of claim 1, wherein the PDA and the cellular phone each has a latching mechanism for latching the cellular phone to the PDA when the cellular phone is coupled to the PDA.
4. (Original) The system of claim 1, wherein the PDA has a cavity configured such that the cellular phone can be inserted therein.
5. (Original) The system of claim 1, wherein the PDA has a cut-out portion configured so that when the cellular phone is coupled to the PDA, the cellular phone substantially fills out the cut-out portion of the PDA.
6. (Original) The system of claim 1, wherein the PDA has a keyboard and a display, the cellular phone and the PDA being adapted so that when the cellular phone is coupled to the PDA, the PDA keyboard and display are used in placing or receiving telephone calls.

7. (Original) The system of claim 6, wherein the cellular phone and the PDA are adapted so that when the cellular phone is coupled to the PDA, the keyboard and the display of the PDA is used along with the wireless communication resources of the cellular phone to connect to and communicate with the internet.

8. (Cancelled)

9. (Currently amended) A system comprising:

a processing device comprising a rechargeable battery; and

a cellular phone comprising a rechargeable battery adapted to be coupled to the processing device so that upon coupling the cellular phone to the processing device the combined cellular phone and processing device forms a single body[.];

wherein when the processing device and the cell phone are coupled the processing device rechargeable battery can power the combined cellular phone and processing device.

10. (Original) The system of claim 9, wherein the processing device is one of a PDA, a laptop computer, a desktop PC, and an automobile.

11. (Currently amended) A system comprising:

a laptop computer comprising a rechargeable battery; and

a cellular phone comprising a rechargeable battery adapted to be coupled to the laptop computer so that upon coupling the cellular phone to the laptop computer the combined cellular phone and laptop computer forms a single body[.];

wherein when the laptop and the cell phone are coupled the laptop rechargeable battery can power the combined cellular phone and laptop.

12. (Original) The system of claim 11, wherein the size of the single body is substantially the same as the size of the laptop computer.

13. (Original ) The system of claim 11, wherein the laptop computer and the cellular phone each has a latching mechanism for latching the cellular phone to the laptop computer when the cellular phone is coupled to the laptop computer.

14. (Original) The system of claim 11, wherein the laptop computer has a cavity configured such that the cellular phone can be inserted therein.

15. (Original) The system of claim 11, wherein the laptop computer has a cut-out portion configured so that when the cellular phone is coupled to the laptop computer, the cellular phone substantially fills the cut-out portion of the laptop computer.

16-19. (Cancelled)

20. (New) The system of claim 1, wherein the PDA battery is the default power source for the combined cellular phone and PDA.

21. (New) The system of claim 20, wherein the PDA further comprises a switch that allows for the user to switch the default power source to the cell phone battery.

22. (New) The system of claim 1, wherein when the PDA and the cell phone are coupled, the cell phone battery can be recharged by the PDA battery.

23. (New) The system of claim 5, wherein the PDA further comprises a sliding door that can conceal the cell phone, and that can also slide open to allow the access to the cell phone when it is coupled to the PDA.

24. (New) The system of claim 11, wherein when the laptop and the cell phone are coupled, the cell phone battery can be recharged by the laptop battery.

25. (New) A system comprising:

a personal digital assistant (PDA) comprising a rechargeable battery; and

a cellular phone comprising a rechargeable battery adapted to be coupled to the PDA so that upon coupling the cellular phone to the PDA the combined cellular phone and PDA forms a single body;

wherein when the PDA and the cell phone are coupled the cell phone battery can be recharged by the PDA battery.

**Amendments to the Drawings**

The attached sheet of drawings includes changes to Fig 3. This sheet, which includes Figure 3, replaces original sheet including Figure 3. The replacement sheet includes a formal drawing for Figure 3.
